

## Visit BK Giulini at Ceramitec 2009 in Munich

Ceramitec Munich, one of the world-wide leading trade fairs for the ceramics industry, will open its doors from 20 October – 24 October 2009.

Based on its long years of experience in special gypsum and plastics systems, which are used as moulding materials for the manufacture of ceramic products, BK Giulini can competently advise and support you in the production of your own pressure diecasting work moulds. Diecasting patterns as well as complete diecasting work moulds are available from our partner Massform, the competent model-making company.

BK Giulini will present the most recent developments in the Gil-Resin product portfolio at its trade fair stand. For information in advance, please see our enclosed brochure in pdf format.

---

### **BK Giulini will be in Hall B6, stand 123**

Our trade fair team is looking forward to your visit and will be happy to advise you.
